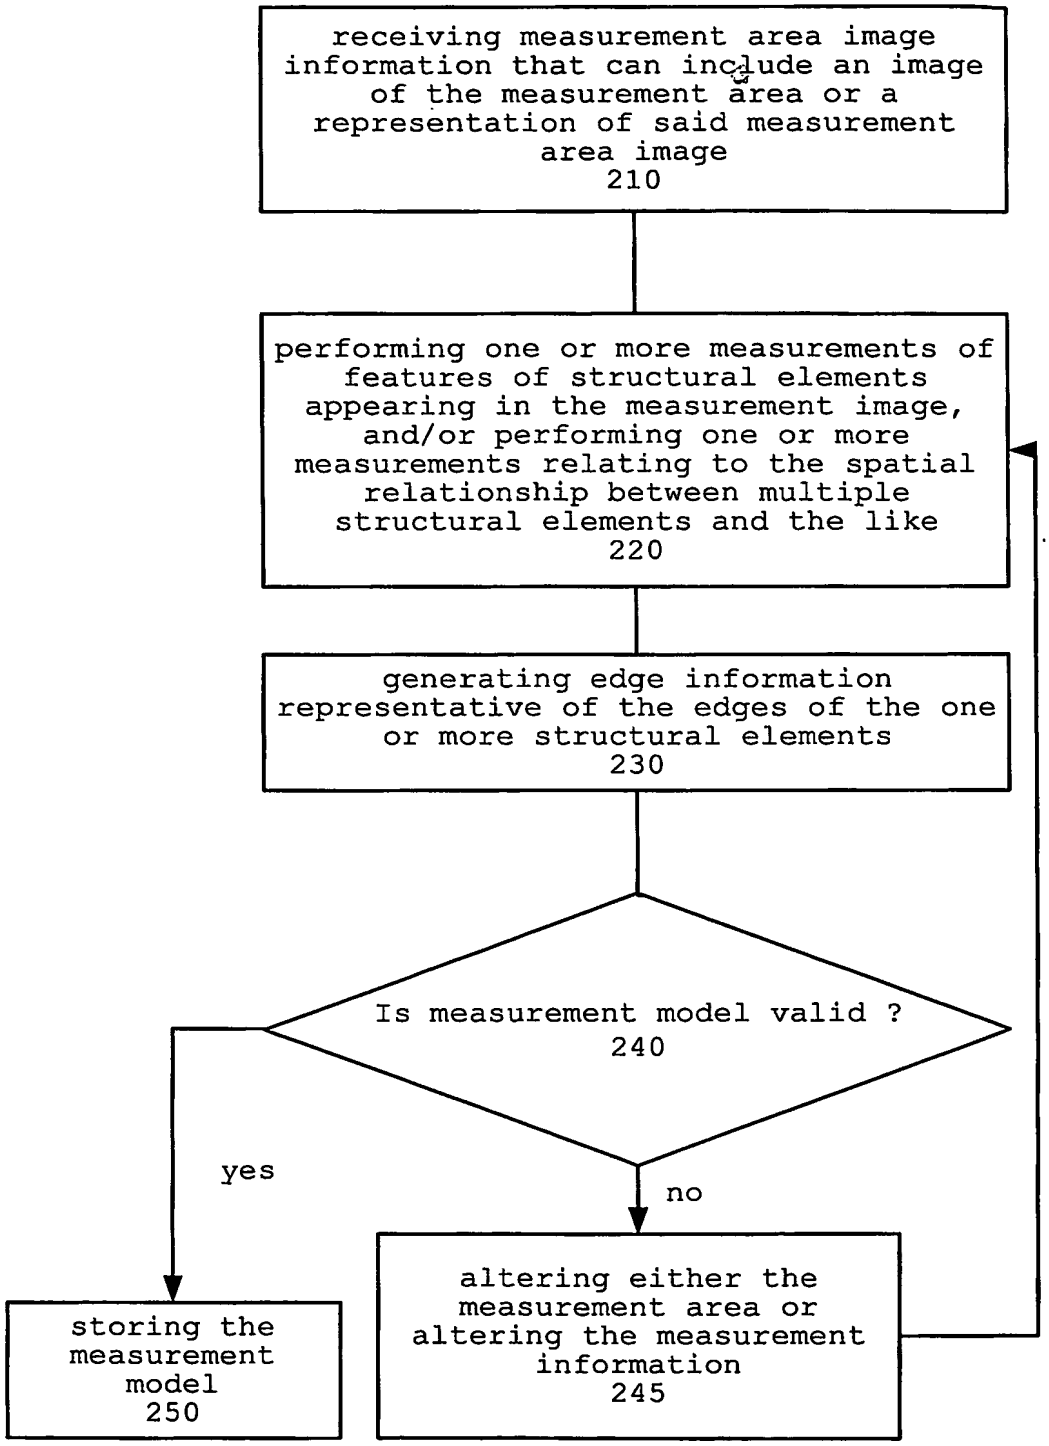
FIGURE 1



receiving measurement area image information that can include an image of the measurement area or a representation of said measurement area image
210
performing one or more measurements of features of structural elements appearing in the measurement image, and/or performing one or more measurements relating to the spatial relationship between multiple structural elements and the like
220
generating edge information representative of the edges of the one or more structural elements
230
Is measurement model valid ?
240
yes
no
storing the measurement model
250
altering either the measurement area or altering the measurement information
245
